PROFESSIONAL SUMMARY

Highly skilled Full Stack Developer with over 6 years of experience, expert in managing backend services and building intuitive user interfaces. Demonstrates end-to-end problem-solving abilities across multiple frameworks and languages.

WORK EXPERIENCE

Senior Full Stack Developer, DataRemote

Jan 2022 – Present

Technologies: React, Python, Flask, Node JS, SQLAlchemy, Docker, MariaDB, MongoDB

- Stepped into a leadership role, directing and coordinating the application team's efforts in developing robust web applications using React.js, TypeScript, and Node.js, leading to a significant increase in site usability.
- Streamlined application deployment and scalability by implementing Docker for application containerization, resulting in consistent development environments across teams and improved overall project efficiency.
- Utilised Python and Flask in backend development, testing, and refactoring, resulting in optimised routes and improved team efficiency in solving high-level programming challenges.
- Leveraged expertise in Node.js and WebSocket technology to manage and optimize server-side logic and implement real-time, bi-directional communication between the server and users. This enhancement ensured seamless user-server interaction, significantly improving the overall user experience.

Mobile & Software Developer, JobCore LLC

Feb 2020– Dec 2021

Technologies: React, Python, Django, PostgreSQL, React Native, Gatsby.js

- Engineered responsive front and back-end applications using React.js, React Native, and Python Django, resulting in improved functionality and optimization. Managed PostgreSQL databases for higher efficiency in data storage and retrieval, leading to a more streamlined data process.
- Created and rigorously tested APIs and implemented UI/UX designs with Gatsby.js, Redux, and Bootstrap, leading to more user-friendly interfaces. Maintained high-quality code standards with Storybooks for UI component testing, ensuring robust and error-free user experiences.

MERN Developer, ImRecruitable

Jan 2018 – Jan 2020

Technologies: MongoDB, Express, React, Node

- Developed a MERN stack web application from scratch increasing operational efficiency and customer satisfaction significantly.
- Implemented back-end functionalities using Node.js and Express.js, handling large number of users, boosting the system's performance and scalability.

SKILLS

Languages: JavaScript, Python, CSS, HTML, SQL, Typescript

Technologies: React, Redux, React Native, Next JS, Node JS, Flask, Django, SQLAlchemy ORM, Express, MongoDB, GraphQL, AWS, Docker, Wordpress, Gatsby JS, Cypress, AWS, GIT.

EDUCATION

Bachelor of Science, BS, University of Miami

Aug 2013 – May 2017

PROJECTS

Bestmiamiweddings

Sept 2021 – Dec 2021

Technologies: Wordpress

- Tailored the WordPress theme for "bestmiamiweddings," incorporating SEO best practices by optimizing title tags, meta descriptions, and integrating SEO-friendly plugins to enhance the website's visibility and ranking on search engines.
